

Transition and AAC

What are your experiences?

Please consider participating in this study if...

- You are 18-26 years old and utilize AAC to communicate
- You are the parent of an individual 18-26 years old who utilizes AAC to communicate
- You are a teacher or speech-language pathologist working with an individual between 18-26 years old who utilizes AAC to communicate

**WE ARE
RECRUITING**

WHY PARTICIPATE?

The purpose of this research study is to better understand how youth and young adults who utilize AAC, their parent(s), and their educational providers are involved in transition planning.

WHAT WILL YOU DO?

As a participant, you will...

- Complete a 10-minute demographic questionnaire.
- Participate in an interview by Zoom or in person that is led by an experienced special education teacher. This will take 15-90 minutes, depending on your needs and preferences.
- Be offered accommodations needed to participate.
